

Simplicity

CRESTWOOD

Contemporary | SELECTIONS

Contemporary refers to a modern aesthetic achieved through minimalist design. Clean and simple lines are the underlying philosophy for contemporary design. Sleek, streamlined surfaces that are highly functional are used.

Moldings and decorative pieces are rarely incorporated into contemporary design. Materials are usually acrylics, melamines, laminates, and metals. However, a slab wood veneer door creates a stunning contemporary look while adding warmth.

Transitional | SELECTIONS

Transitional design borrows elements from both contemporary and traditional while not going to the extreme in either direction. This fresh new look has streamlined surfaces that incorporate traditional ideas.

Intricate moldings and carvings are typically not found in transitional design, however, the use of wood keeps it from looking too contemporary. Transitional design blends old with new giving it a timeless look.

Traditional | SELECTIONS

Traditional design offers a combination of comfort and classic features. The focus is to create a warm, homey feel.

More ornate moldings and carvings are used as well as raised panel doors. Traditional design uses natural materials, such as wood and stone embracing the imperfections in each. Cabinets are often glazed and distressed to give them a time-worn look.

Stain | SELECTIONS

Stains are sprayed over the surface and then wiped by hand to create deep, rich color and enhance the grain. Stained finishes are protected with Crestwood's Five-Star Evolution finish, a two part acrylic polyurethane chosen for its exceptional durability and beauty. Accent glaze in Mocha, Gray, Brown or Black is available on any stain finish.

BEECH & RUSTIC BEECH

Is typically a pale cream color, sometimes with a pink or brown hue. Beech is very hard, heavy in weight with excellent shock resistance. Wood has a moderately tight, fine grain texture. Rustic beech may contain mineral streaks, gum spots, sap, and open and closed knots and does not affect veneered parts.

Stain | SELECTIONS

CHERRY The heartwood of cherry varies from rich red to reddish brown and will darken with age and long-term exposure to light. Comparatively, the sapwood tends to be creamy white. The wood has a fine uniform straight grain, a smooth texture, and may naturally contain pith flecks, pin-hole knots and small gum pockets

Stain

SELECTIONS

HICKORY & RUSTIC HICKORY

The sapwood is white with subtle fine brown lines while the heartwood is pale to reddish brown and provides a wide contrast in color and grain. The grain tends to be fine, and is normally straight but can be wavy or irregular. Hickory is naturally hard and typically heavy compared to other hardwoods. Rustic Hickory may contain mineral streaks, gum spots, sap, and open and closed knots and does not affect veneered parts.

Fairfield Door
P. Maple Porch Swing

Stain | SELECTIONS

KNOTTY ALDER known for its light natural color, which is often brown or reddish in hue. It exhibits a uniform, straight grain and fine texture known for ease in staining. Knotty Alder will contain open and closed knots and affects both lumber and veneered parts.

NOTE: Wood tones and colors shown in the brochure may vary slightly from actual finishes due to normal printing reproduction. Please see your Authorized Crestwood Dealer for actual samples.

Stain | SELECTIONS

MAPLE Color ranges from nearly white, to an off-white cream color, sometimes with a reddish or golden hue. It may contain fleck marks, as well as small amounts of mineral as naturally occurring characteristics. The wood has a close fine uniform texture and is generally straight-grained, but it can also exhibit “curly grain” or “birds-eye” figure.

OAK hardwood is a high grade northern red oak. Red oak from the northeast is known for its beautiful texture and color. The wood has an open grain which varies from vertical to a sweeping arch pattern. Oak will vary in natural tints and shades of white, pink, grey, and green.

QUARTER SAWN SAPELE

hardwood is a high grade African Sapele. The wood grain is fine textured and quarter sawn. Quarter sawn surfaces can also exhibit a ribbon-stripe appearance. Sapele is medium to dark brown or reddish-brown. The wood can exhibit some sapwood in shades of white or yellow. Depending on the amount of exposure to light, the color in sapele will darken naturally in a very short period of time.

QUARTER SAWN WHITE OAK

hardwood is a high grade northern white oak. The wood grain is open, but very fine. Heartwood is a light to medium brown, commonly with an olive cast. Nearly white to light brown sapwood is not always sharply demarcated from the heartwood. Quartersawn sections display prominent ray fleck patterns. Some wide grains will show up with the fine. The medullary rays may vary from small to large.

RIFT WHITE OAK

hardwood is a high grade northern white oak. Color can range from light brown to biscuit to light grey. The wood grain is open, but very fine. The fine grain is made by rift cutting. Rift cut produces a somewhat straight, combed grain in veneer and in solid wood. Flake (quartered look) can and will be in Rift cut White oak veneers and solid woods. Veneer is quarter slice and book match.

WALNUT

hardwood can range from a lighter pale brown to a dark chocolate brown with darker brown streaks. Color can sometimes have a gray, purple, or reddish cast. Sapwood is pale yellow-gray to nearly white. Grain is usually straight, but can be irregular. Pin knots with small dark centers may be prevalent.

Statement | SELECTIONS

Statement finishes are created with layers of finish colors, glaze, and hand-distressing techniques to create realistic hand-rubbed and worn look. Glazing is an artistic technique and is intended to have a very inconsistent look. Build up in corners and profiles may range from heavy to nonexistent. We recommend viewing a sample door in the style you prefer to see the total effect of the glazing. Although we strive to reproduce a facsimile of the glazes, be aware that the finish process is an art form. A sample door is only a snapshot in time. Each artist will add his or her own flair, which will individualize every job.

NOTE: Wood tones and colors shown in the brochure may vary slightly from actual finishes due to normal printing reproduction. Please see your Authorized Crestwood Dealer for actual samples.

Paint/Glaze | SELECTIONS

Glaze is applied over the paint. The glazing processes are not applied to the backside of doors or drawer fronts. Glazes are intended to have a very inconsistent appearance. Build up in corners and profiles may range from heavy to nonexistent. Brush marks may lap at wood joints. We recommend viewing a sample door in the style you prefer to see the total effect of the glazing. Although we strive to reproduce a facsimile of the glazes, be aware the the finish process is an art form. A sample door is only a snapshot in time. Each artist will add his or her own flair, which will individualize every job.

Rough Hewn | SELECTIONS

Rough Hewn Collection is a selection of finishes on HICKORY made to resemble reclaimed lumber with an aged or timeworn finish. The wood has been wire brushed and distressed and includes nail holes which appear randomly in doors with some including a “rusted” nail in an effort to mimic reclaimed lumber.

Paint | SELECTIONS

Paint colors are obtained by applying a two-component (2K) Italian polyurethane system on “paintable” species; see Crestwood’s Five-Star Evolution Finish. 2K polyurethane is even more durable than conversion varnish. According to the Architectural Woodwork Institute, it is more wear, heat, solvent, moisture, and stain resistant.

NOTE: Wood tones and colors shown in the brochure may vary slightly from actual finishes due to normal printing reproduction. Please see your Authorized Crestwood Dealer for actual samples.

Paint | SELECTIONS

Super Matte | SELECTIONS

The continuous research for high-performance products that fit current designs and trends of Zero Gloss has led Crestwood to introduce a new super matte product that shares the same technical and aesthetic characteristics of our current products. Crestwood's new Super Matte has a nice velvet feel while maintaining superior mechanical and chemical resistance properties that have become a standard on our finish offerings. Super Matte can be characterized by four bullet points

1. Zero Gloss Opacity
2. Exceptional scratch resistance
3. Exceptional chemical resistance
4. Exceptional softness to the touch

NOTE: Wood tones and colors shown in the brochure may vary slightly from actual finishes due to normal printing reproduction. Please see your Authorized Crestwood Dealer for actual samples.

Chatham Door
Paint Maple Custom Color Match

Crestwood's 5-Star Evolution Finish

- ★ Superior mar, water, solvent and household chemical resistance
- ★ Superior impact resistance
- ★ Formaldehyde-free
- ★ Low in HAP's and VOC's
- ★ More flexible to show less cracking from wood expansion and contraction

Reconstituted Veneer | SELECTIONS

Reconstituted veneers are cut from "A" grade Obeche, Koto, or Poplar logs. Reconstituted veneers are dyed with a computerized water soluble process assuring duplication of color and pressed into blocks which are then sliced into amazingly realistic, real wood veneers. The advantage of reconstituted veneers is their consistency in color and grain.

Veneers are available in Natural Satin or Natural Flat finish on Studio and Metro door styles. Standard with vertical grain, optional horizontal grain or matching vertical grain available.
